To whom it may concern,

I am reaching out in regard to the reports of Columbia Gas vehicles potentially being on the property of the church/school. There is no documentation of any work being done or leaks being repaired this week or the past week. We are required, by law, to do safety checks on all of our facilities to check for any hazardous conditions (leaks, corrosion, etc.). If any conditions are found, this would be well documented and repaired/replaced accordingly.

I will mention that there is a gas regulator system down the road that is serviced by Columbia Gas, Peoples Gas, and EQT. That being said, there will be trucks in that vicinity doing safety checks or reading charts at the regulator station from time to time.

If you have any further questions, feel free to reach out. Thank you.

David Natale
